## WHAT IS NGI COMMONS?

**NGI Commons** is a Coordination and Support Action, funded by the European Union's Horizon Europe programme.

It aims to strengthen the integration of **Digital and Internet Commons** at the national and European levels. Through NGI Commons, the goal is to foster a thriving ecosystem for open source initiatives ensuring their importance is reflected in strategic decision-making.

The NGI Commons project aligns and integrates **Next Generation Internet (NGI)** efforts, addressing key governance issues such as digital sovereignty, cybersecurity and personal data self-determination.

**NEXT  
GENERATION  
INTERNET**

## OUR OBJECTIVES

1

**Depict and analyse** the European digital/internet commons context, identifying the main priorities for future developments and analysing the impact of the NGI.

**Engage and liaise** with relevant initiatives across the European digital/internet commons landscape to analyse the NGI portfolio and develop a plan to support further development of the commoners' efforts.

2

3

**Develop a strategic agenda** including digital/internet commons policies valid for the EU Multi-annual Financial Framework (MFF) timeframe, and define a long-term strategy based on this agenda.

**Increase awareness and promote digital/internet commons** initiatives, as well as relevant digital sovereignty policies and NGI efforts contributing to a broad, sustainable and impactful exploitation of assets.
